

WEST COAST PARANORMAL RESEARCH SOCIETY

Case #: 07-1110
Case: [REDACTED] House Restaurant
Address: [REDACTED]
Contact: Sylvano [REDACTED]

THE INVESTIGATION

Our second investigation at this location occurred on Friday 11/16/07. We arrived at the location at 8:00pm. Present were Troy (Founder), Carol (Case Manager) and Mike (Tech Assistant). The restaurant had a cook who was going to be cooking in the kitchen most of the evening and another team member Ryan would be joining us later in the evening for a couple of hours. We wanted to keep this team small as we were going to focus all of our attention on trying to make contact and wanted to perform some controlled experiments. Upon our arrival, we met Sylvano in the parking lot so we were able to meet with him immediately. We went upstairs as there were no patrons up there and sat at one of the tables. We set up our computer and played a few of the EVP's that were obtained from our last visit. Sylvano explained that Bruno had some questions he wanted answers for, so we made note of them and gave him a CD of the few EVP's we had to give him at that time.

We spoke with Syvano and several staff members for a couple of hours. Also during this part of the evening, a few patrons were touring the area where we were and were interested in our activities. We spoke with them also, so our investigation didn't start until approximately 11:30pm.

We set up only 4 IR cameras this time. They were set up to monitor the experiments and to record certain areas of concern. Outside the room that was the old balcony area of the dining room, we set up a "live" feed recording system that was set up to record audio and play it back in real time. It was our intention to catch the EVP's while they happened in hopes to be able to communicate directly with the spirits.

It appeared that the Blue Room had young children spirit activity, so we set up two controlled experiments there. In the south west corner of the room, we placed a large children's bouncing ball, a small 5" rubber basketball, two small toy vehicles that had free moving wheels and a small child's cup with a mirror on the bottom. All of these items were marked as to their placement to identify their locations in case they happened to move. In this same room on the north east section of the room, we set up a laptop computer that was set up with a DVD to play cartoons. We pulled a chair out and placed it in front of the computer and placed a K2 EMF reader on it. The meter was placed to show if any unusual magnetic field were to be in the area of the chair, causing this meter to light up to confirm this. In the back of the room, we placed a CD player that would play children's music throughout the night. All of this was done to encourage the young spirits to interact with the items, and hopefully document this.

Along with the "live" feed microphone set-up, we placed nine handheld digital recorders in the following locations: two were in the Blue Room - one in the center of the table and one on the floor next to Troy who was sitting with the toys, one in the Green Room, old balcony area room, at the top of the stairs, at the base of the stairs on the banister (the extra coverage for the stairs was to check to see if the EVP we got last time would repeat itself. If it did, most likely it would be the result of a residual energy causing this phenomenon) and in the small dining room downstairs next to the bar room.

We started by calling for all the spirits to meet with us upstairs. We explained to them that we heard them on our recorders the last time we were there and asked them to give us more information so we could help them. We addressed questions to them that Bruno the owner wanted answers to. Among them were: Do you like it here? Do you like what Bruno has done with the restaurant? Are you happy here? Will Bruno be successful with the restaurant? We asked these questions in the area of the "live" microphone and within voice reach of a stand alone recorder in the balcony room. We did not get any "live" feed spikes to indicate that we were receiving EVP's, however we continued our efforts knowing we would be reviewing all the recorders anyway.

We investigated downstairs, walking around and asking questions. We left Mikes recorder in that small room next to the bar room and checked the room out for EMF readings. We were following up on EVP's we had received there previously. The only unusual activity occurred in the north/west corner of the room where Carol was getting high EMF readings spiking over 10.0 on the gauss meter. We were able to debunk this as the bar room right behind this wall has electrical equipment along that wall and was most likely the cause. We were unable to definitely rule this out as the room was locked, however the visual of the room through the slot in the door appeared to identify the electrical cause.

Troy moved to the staircase outside the office at approximately 2:00 am, hoping to catch a repeat of the EVP we caught of the woman crying and being dragged upstairs which occurred at approximately 2:40am on 11/10/07. Troy remained on the staircase for approximately an hour and did not sense anything unusual. We conducted our investigation keeping mostly quiet, hoping to give us clear EVP's to the questions we had previously asked.

THE EVIDENCE

The White House did not give us any unusual or bad feelings. We did get some EVP's from our recorders and the most notable are listed below:

Carol also picked up an EVP when asking "Can you tell us your name?" She picked up a males voice that said "Craig".

Another particularly noteworthy EVP received on Carol's recorder was when she was talking with another investigator and stated that they should check out the Carter Room, a child's voice is heard saying "Where's the Carter Room.....That's the Blue Room".

While in the Blue Room, Troy picked up an EVP of a small child saying "Hi Guys!"

An interesting EVP was obtained on Mike's recorder when downstairs in the small room that is the last room on the left from the back door hallway (next to the bar room). Mike's team had just been given direction on their walkie-talkie to take over the investigation upstairs. As they were leaving, an EVP of a girl was caught saying "Their coming...their coming up", clearly referring to Mike's team heading upstairs to start their investigation up there.

Numerous EVP's were picked up from many different recorders. One most disturbing EVP was picked up by a recorder left at the top of the stairs outside the office door. This recording is of a woman crying and begging "No..no..no..please don't take me up the stairs...no.. please.. stop it!" This is labeled as "Woman Crying - Outside Office Door" in the EVP folder for 11/10/07. Ironically, this same recording was picked up in the old balcony area; this recording is also included as "Woman Crying - Old Balcony Room - Troy's Recorder".

After listening to all of the EVP evidence, it appears that the White House is home to numerous spirits. The recordings we captured have voices of children, adults, men, women and one in particular- a man who does not appear to be very nice. With extremely sensitive equipment we were able to hear him calling one of our female investigators a "bitch". He appears to be the same man who left the sinister laugh on Carol's recorder.

Numerous EVP's that were clearly audible with standard equipment and earphones were clipped and placed in file folders on the included CD. They cover different areas of the restaurant and they include EVP Logs which describe where they were found.

When reviewing the recordings from the infrared cameras, nothing unusual was captured.

When reviewing almost 200 photograph's, nothing unusual was captured.

We were not able to use the thermometers as the air conditioning was running inside the restaurant, so the readings were unreliable.

The only personal experience occurred in the Office area by Carol the Case Manager and occurred during the walk-thru. She was inside the office behind the door looking at the window when she heard a loud female "sigh" occur right behind her. Thinking that she was blocking the office door for someone, she turned and opened the door only to find no one there. There was no one in the area at the time.

Our investigation concluded at approximately 3:40am. We packed up our equipment and left the location at approximately 4:00am.

THE CONCLUSION

Based on the personal experience had by Carol and the numerous EVP's received that were "intelligent" meaning that they interacted with us, it is our conclusion that the White House Restaurant is active with paranormal activity. There are active spirits residing at the location which is evident by the EVP recordings obtained from numerous areas of the

restaurant. While this location is considered, "active", there was no direct evidence to consider it "haunted" as no visual evidence was obtained nor were there any physical disruptions made by the entities. It should be noted that there is absolutely no evidence that any of these entities are dangerous to the restaurant patron's or its employees.
